Time allowed—Three hours.

Maximum Marks—50.

Write an essay on any one of the following subjects:—

- (1) Machines in Modern Warfare.
- (2) Indian Transport Problems.
- (3) 'Invention is the curse of modern civilization.'
- (4) The Use of Leisure.
- (5) A.R.P.
- (6) Women in Industry.
- (7) When the War is over—

ENGLISH

PAPER 2.

Time allowed—Three hours.

Maximum Marks—50.

The number of marks assigned to each question is indicated at the end of the question.

1. Make a précis of the following passage in about 200 words:—

When the history of America's part in this second World War comes to be written, one chapter will have to be devoted to that weird and wonderful invention—the national test poll. It is not so long since Dr. George Gallup, Director of the American Institute of Public Opinion, invented this handy device for telling America what it is thinking on any subject from Hitler to hydroponics, but already the average run-of-the-mill Yankee has developed a touching faith in the infallibility of polls to inform a harassed world what's going on around here.

The test poll is the greatest labour-saving device of the age. In order to discover just what he should think to be safely on the side of the big battalions, the American citizen in 1941 has only to glance at a daily newspaper. Thus he could discover that 56 per cent. of the American people favoured the U.S. Navy convoying in order to get lease-lend supplies to Britain, 21 per cent. favoured America's immediate entry into the war, and 61 per cent.

- (2) Total War.
- (3) The Contribution of the Engineer to Human Welfare.
- (4) Poverty in the midst of Plenty.
- (5) The Future of Aeronautics.
- (6) The Cinema.
- (7) 'To travel hopefully is better than to arrive, and the true success is to labour.'

ENGLISH

PAPER II

Time allowed—Three hours

Maximum Marks—50

1. Write a précis, which should contain about one-third (about 300) only of its present number of words (about 900), of the following passage. Before doing so, you are advised to read the passage carefully, noting those points which you consider to be the most important. Mark off every ten words in your answer and at the bottom state the number of words which it contains. Your answer should be framed in good flowing English and not in telegraphic style.

At nine o'clock on the evening of August 27, 1914, General Foch, the Commander of the 20th Army Corps, who was at the inn called 'Les Oeufs Durs', to the north of Vitrimont Wood in Lorraine, received a message from Joffre, the Commander-in-Chief, summoning him to take command of the newly formed 9th Army. As his Chief of Staff he was allotted Colonel Weygand; thus began one of the famous combinations of military history.

Decisive results soon followed. The 9th Army took over one of the most vital sectors of the line, and on September 9th and 10th the famous 42nd Division went forward over the marshes of St. Cloud in the counter-attacks which proved a turning point in the Battle of the Marne. Weygand was on the spot to organize the offensive. At an even more perilous moment, when the German armies seemed on the point of breaking the Allied line, Foch was appointed to the supreme command again, with Weygand as his lieutenant.

Question Papers for the written tests held in 1941, 1942, 1943, 1944 and 1945 for the Selection of Special Class Apprentices in the Mechanical Engineering and Transportation (Power) Department of the Superior Revenue Establishment of State Railways.

1941

MATHEMATICS—ALGEBRA AND TRIGONOMETRY

Time allowed—Two hours

Maximum Marks—100

Candidate should attempt six questions, three from each section

All the questions carry equal marks

Candidates must answer each section in separate answer books. The appropriate section should be marked on the cover of each answer book used.

SECTION A

1. (a) Find the condition that ax^2+bx+c and $a'x^2+b'x+c'$ may have a common factor of the form $x+f$.

- (b) Find the square root of

$$x^3 - 4x^{\frac{5}{2}} + 4x + 2x^{\frac{3}{2}} - 4x^{\frac{1}{2}} + x^{\frac{3}{2}}.$$

2. (a) Resolve into factors:—

$$(x+y)(y+z)(z+x)+xyz$$

- (b) Simplify

$$\frac{(a+p)(a+q)}{(a-b)(a-c)(x+a)} + \frac{(b+p)(b+q)}{(b-c)(b-a)(x+b)} + \frac{(c+p)(c+q)}{(c-a)(c-b)(x+c)}.$$

3. (a) Show that if

$$\frac{x}{a+2b+c} = \frac{y}{a-c} = \frac{z}{a-2b+c},$$

then

$$\frac{a}{x+2y+z} = \frac{b}{x-z} = \frac{c}{x-2y+z}.$$

- (b) Eliminate x, y, z from the equations

$$\frac{y}{x} + \frac{x}{z} = a, \quad \frac{z}{y} + \frac{y}{x} = b, \quad \frac{x}{z} + \frac{z}{y} = c.$$

4. (a) If

$$\left(\frac{a}{b}\right)^{2ab/(a^2-b^2)},$$

show that

$$\frac{ab}{a^2+b^2} \left(x^{a/b} + x^{b/a} \right) = \left(\frac{a}{b} \right)^{(a^2+b^2)/(a^2-b^2)}$$

- (b) A man buys a certain number of mangoes. Had they been half an anna each dearer he would have got 6 less, but had they been half an anna each cheaper he would have got 12 more. How many mangoes did he buy, and at what price?

5. Solve the equations

(i) $\sqrt{ax+b^2} + \sqrt{bx+a^2} = a-b.$

(ii) $x^2-xy=8x+3, xy-y^2=8y-6.$

6. (a) If α be one root of $4x^2+2x-1=0$, prove that the other root is $4\alpha^3-3\alpha.$

- (b) If α, β be the roots of $px^2+qx+r=0$, form the equation whose roots are $(\alpha-\beta)^2$ and $(\alpha+\beta)^2.$
